

Electric fish scale remover

FISH SCALER

AST-150 -Right-handed use-

Patent pending

Proprietary design of rotating blades

Proprietary design of 10 blades with angles that can completely remove even fine scales!

Commercial use

The motor is built into the main unit, so the rotating blades and grip can be washed with water!

Includes safeguards

A safety feature that automatically turns it off when it senses an unusual load!

Uses

Seafood processing plants

Supermarkets

Sushi restaurants and other dining establishments

Hotels, inns, etc.

Workers in the fisheries industry

Snapper Herring Salmon Tilapia

It is ideal for scale removal of any size of salmon from small to large. The conical shape blade is also good for herring, haddock, tilapia, halibut, and so on.

Wall mounting
Includes wall mount brackets

Rotation speed knob

- Depending on the size of the fish, the speed can be adjusted up to 4,500rpm.
- Features a water-proof design that is safe to touch with wet hands.

Motor

- A high-capacity motor with a maximum output of 130W. It is quiet when running with minimal vibration and low noise.
- When a towel, fingers, etc. gets caught in it or in similar situations when it senses an unusual load, it will automatically shut off as a safety feature.

Electric power socket

- An internal adapter for use around the world, supporting use from 100V to 240V.

A safety cover for the rotating blades

- A slim form that helps prevent scales from flying up.

Rotating blades

- The proprietary design including 10 blades with angles means that it will completely remove even fine scales.
- It is made of stainless steel with electrolytic polishing treatment applied, making it very easy to clean and remove dirt.

A flexible shaft

- There is no motor in the grip section, so you can wash it together with the rotating blades for excellent sanitation.
- The grip is thin and uses a slip-resistant rubber that is comfortable to hold for a long time.

Wall mounting

On the work table

The unit must be installed on the wall when you place it at a high place. The unit is not water-proof.

**Please use in the following environment.

Temperature: 5 - 35°C Humidity: - 85%

[Specifications]

Product name	: Electric fish scale remover
Model	: AST-150
Power source	: 100 - 240V 50/60Hz
Main unit dimensions	: 200 x 110 x 150mm
Main unit weight	: 2.2kg
Handle section weight	: 480g
Rotation speed	: 0 ~ 4,500rpm (rotates to the right)
Flexible shaft length	: 1.5m / 2.0m (build-to-order)
Maximum power consumption	: 130W
Electrical cord length	: 1.5m

*This product is for right-handed use.
