Spectral characteristics

**FL-20SBL Luring light**

Lure flying insects efficiently by 365nm wavelength of light.  
High insect luring efficiency.

**S-20 Insect trap adhesive tape**

Adhesive resin tape with sustainable adhesive force

Holds the dead insect on the adhesive tape to maintain environment clean.

The special adhesive resin sheet that can sustain adhesive force more than one year from the start of use has the highest level of capture force in the industry.

Even if only a leg of an insect touches the sheet, it can capture the insect, as the sheet has a thick adhesive layer.

Keeps its stickiness for more than 3 years in stock, 1 year in use.
